EXECUTIVE SUMMARY

Proudly supplying over 5000 companies worldwide with a complete spectrum of customized apparel and healthcare supplies.

PRODUCTS & SERVICES:

- *Branded Private Label Merchandise & Accessories
- *Medical/Workwear Uniforms
- *Custom Event Apparel & Giveaways
- *Promotional Products
- *Healthcare Supplies & Equipment
- *Full-scope Design

As a FULL-custom manufacturer, Dioz Group swiftly ascended into global predominance since its genesis back in 2006 . Now, between *Fortune* 500 clientele, thousands of factory workers, and all-inclusive/complimentary services; Dioz Group has solidified itself as the apotheosis of private label production.

Among numerous holdings, Dioz Group owns and operates *Oasis Apparel*, *Alanic Activewear*, and *8Health*. With offices in Los Angeles, Connecticut, London, Dubai, Australia, India, and China; our dedicated staff operates 24/7 to ensure the fulfillment of every client's unique project requisites.

RECYCLED POLYESTER - HOW it's made

STEP 1

Plastic PET containers are picked up at community recycling center, then sorted by type and color.

STEP 2

They are stripped of their labels and caps, washed and crushed, then cropped into flake.

STEP 3

The flakes undergo a second melting and are made into consistently shaped pellets.

STEP 4

The pellets are melted and extruded to make fiber. The fiber is crimped, cut drawn and stretched then baled.

STEP 5

The baled fiber can be processed into fabric for a variety of textile product end uses.

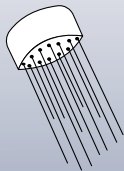

Plastic bottle are
collected from
recycling centres

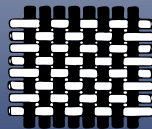

Sorted & mechanically
shredded

Melted down & forced
through a spinneret to
create fibres

Processed & spun
into thread

Knitted or woven
into fabric

Made into garments

Honestly

Made from at least

15 Plastic Bottles
